Green Initiative:

We are very interested in being a part of the communal efforts to be better stewards of this planet. Our water is filtered as it comes into the studio so every faucet is clean and pH balanced. Plates, cups and silverware are available for your craft service needs and our dishwasher is quiet. All of our house lighting is on occupancy sensors and will turn off automatically. The bathrooms are equipped with automatic faucets, hand driers and double flush toilets.

Your part ...

Your refuse must be separated for recycling (paper/containers), compost and garbage using receptacles available throughout the facility. We *highly discourage* the use of plastic bottles for beverages or plastic tableware. **Your half-day rental includes up to 5 and full-day rental up to 10 reusable stainless steel bottles (1 per cast/crew)** for you to distribute amongst your party (*more are available for \$5/each*). If you separate your garbage, do not bring in plastic bottles and use our place settings (or compostable settings you provide and remove), **you will be eligible for a \$50 (half day) or \$100 (full day) refund.**
